Library of Nature Slides - for sale

Part 5: Habitats & Other Subjects slides

PLEASE ORDER SLIDES IN NUMERICAL ORDER!

In addition to the catalogued slides listed above, we also have thousands of habitat slides from all over the U.S. and Canada. In collecting these slides we have focused on several goals:

- Habitats for particular species of birds (other vertebrate). In a few cases the bird itself is a distant feature in the photo. To illustrate the breadth of our collection, we can provide a breeding habitat photo for nearly every North American warbler and sparrow.
- Plant communities and their indicator species.
- Environmental problems.
- Trees, especially conifers--including close-ups of foliage, cones, bark, etc.
We also have pictures of wildflowers, insects, spiders, and even beautiful sunsets. We invite you to come to us with your specific needs.
